

## ERA-EDTA CME COURSE

### International Centre of Biocybernetics Seminar

## Management of fluid overload in dialysis patients

October 21-23, 2016

#### Seminar goals:

- ⇒ To provide up-to date knowledge and new insights into the complex problem of **how to assess, monitor and maintain adequate fluid status in maintenance dialysis patients.**
- ⇒ To review and discuss specific questions related to each of the specific dialysis modalities (hemodialysis, hemofiltration, peritoneal dialysis). The attention is focused on **the optimization of fluid removal by dialysis and the mechanisms of fluid transport in the body during dialysis.**
- ⇒ To discuss briefly fluid management in pre-dialysis ESRD, acute kidney injury and heart failure patients.

#### Lectures by:

Wim van Biessen, Adrian Covic, Simon Davies, Malgorzata Debowska, Kai Harenski, James Heaf, Olof Heimbürger, Jeroen Kooman, Ken Leypoldt, Bengt Lindholm, Elizabeth Lindley, Mauro Pierroni, Bengt Rippe, Daniel Schneditz, Joanna Stachowska-Pietka, Jacek Waniewski, Zofia Wankowicz, Andrzej Wiecek, Wojciech Zaluska

**Granted 12 European CME credits (ECMEC) by the European Accreditation Council for Continuing Medical Education**

**ERA-EDTA Travel Grants for young participants**
