

ERA-EDTA CME COURSE

International Centre of Biocybernetics Seminar

Management of fluid overload in dialysis patients

November 16-18, 2018

Seminar goals:

- ⇒ To provide up-to date knowledge and new insights into the complex problem of **how to assess, monitor and maintain adequate fluid status in maintenance dialysis patients.**
- ⇒ To review and discuss specific questions related to each of the specific dialysis modalities (hemodialysis, hemofiltration, peritoneal dialysis). The attention is focused on **the optimization of fluid removal by dialysis and the mechanisms of fluid transport in the body during dialysis.**
- ⇒ To discuss briefly fluid management in pre-dialysis ESRD, acute kidney injury and heart failure patients.

Lectures by:

Adrian Covic, Malgorzata Debowska, Jorge Echeverri, James Heaf, Olof Heimbürger, Jeroen Kooman, Raymond Krediet, Mark Lambie, Ken Leypoldt, Bengt Lindholm, Elizabeth Lindley, Beata Naumnik, Carl Oberg, Daniel Schneditz, Joanna Stachowska-Pietka, James Tattersall, Jacek Waniewski, Zofia Wankowicz, Andrzej Wiecek, Martin Wilkie, Wojciech Zaluska
